

My Cleaning Service uses cleaning procedures and solutions with you in mind. The materials and equipment implemented in our program include labeling for green use and are safe for our employees, yet powerful enough for health facility use and for cleaning and disinfecting to remove harmful pathogens and bacteria.

ProTeam HEPA Filtration Backpacks and Vacuums

- Improves air quality with multiple layers of filtration, collecting allergens and particles 1 micron and larger and keeping them captured
- Versatile and productive with kits and ergonomic backpack solutions
- Handles small spaces and high square footage areas
- GoFree Flex Pro options for quieter motor, weight adjustments, increased runtime and provided tools for challenging environments
- ProTeam is proud to have an American Lung Association® partnership
- Earned Seal of Approval/Green Label for meeting high standards by Carpet and Rug Institute (CRI)

High/Low Floor Machines & Pads

- Includes safety features preventing accidental starts and built-in circuit breaker to protect motor life
- dust control and economic design for cleaner, shinier floors
- Burnishers with adjustable handle and seat and non-marking bumper
- Easy to operate and replace paper bags and pads
- Scrubbers include built-in pre-sweeping, large tanks, steerable scrub deck, dirty water drain and squeegee blade set
- Fast and efficient floor machines cover thousands of square feet

Separation Mop Buckets, Floor Signs, Trash Carts, etc.

- Use of polyethylene products prevent dents, peeling, corrosion and moisture absorption
- Separation mop buckets preserve the solution water
- Trash carts for flexibility in collection and transport of trash
- Maneuverable swivel and roller bearing wheeled devices provide ergonomic solutions for employees
- Carts are easy to clean and designed for efficiency in storage on the go
- Wet floor signage and cones separate cleaning areas, to keep people safe from slipping or falling on wet, recently cleaned floors

Color-coded Microfiber Cloths and Mops

- Surface pores and crevices ensure deep, effective cleaning
- Color-coded microfiber cloths prevent cross-contamination and streamline cleaning in different areas
- Color-coded microfiber mops for separating treatment of restroom and general area floors and preventing cross-contamination
- Microfiber is the most efficient material for collecting and trapping both dust and wet materials
- Environmental standard for janitorial services as it reduces water and chemical usage, while weighing less than other materials

Ready to Dispense Solutions and Disinfection Sprayers

- Dilution control of ready to dispense solutions is easy to use right out of the box increasing productivity
- Variety of market solution products including wall-mountable, basket/holster, and water hook-up connection accessories
- Safety in solutions are safe in case of skin contact and do not require water rinsing
- Fast-acting EPA-certified disinfectant is hospital-grade, yet safe with short set time, preparing surfaces for reuse sooner
- Sprayers/foggers provide longer-lasting sanitization and prevention of the spread of bacteria, using electrostatic charge technology

Bloodborne and First Aid Kits, Safety Data Sheets and PPE

- On-site bloodborne and first aid kits and Safety Data Sheets (SDS) comply with OSHA requirements
- Following SDS aids in improving cleaning practices, air quality and environmental conditions of our places of work
- Training regarding bloodborne and other microbial organism cleanup as part of Safety Manual keeps employees informed and safe
- Personal Protective Equipment (PPE), including gloves, face masks, and protective eyewear ensures employee safety from contacting harmful bacteria and pathogens and safety of others in the space as well
